'Pied Piper' Led Jefferson County

The election results show Jefferson County to have again disgraced the state. Why a majority of voters here can allow themselves to be hornswoogled every time an election is held passes all understanding. That we are infinitely better off with Sen. Hill in Washington is absolutely beyond question.

A majority of voters in Jefferson County follow the Pied Piper of conservatism into the choice of voting for a man with no experience whatever against an outstanding statesman nationally important and with a record in the Congress of the United States.

A minority of voters in Jefferson County have recognized a sheep following its leader. Someone started a cult to hate all Kennedys and everyone speaking to them.

It is a cult around here for everyone from the lowest to the highest to refer to the President as "Jack," and the former Senator as "Bobby Sox." These are the same ones who referred to Mrs. Roosevelt as "Mrs. Eleanor."

There is no one in Alabama who does not think segregation is the better way for all of us. Sen. Hill, Sen. Sparkman and all our congressmen have so far done a miraculous job along with other Southern congressmen in preventing a complete takeover by the three-fourths congressmen from other areas. So my plea is, from now on, vote for the ones who have been tried and not found wanting.

I am also in the same boat with most everyone else on foreign aid. I do not think you can lose the friendship. However, such

as has been done by our senator on foreign aid was at the request of president's secretaries, secretaries of state of both parties, secretaries of defense of both parties, chairmen of Senate Foreign Relations, Republican and Democratic leaders in the Senate. Against such

men only a chump would go to bat. If Sen. Hill had voted against them

it would have made no difference, as they would have made no difference, as they

would have made no difference, as they
